CIRCVET Project

THE VALIDATION PROCESS IS STARTED!

The last CIRCVET Steering Committee was hosted by the partner **Proplast**, in Alessandria (Italy), on 20th and 21st February. This meeting was one of the most important of the project of the project due to the fundamental aspects that have been faced by the partners together, focusing on the final KPIs to be reached and the last dissemination, communication and exploitation workshops to be organized by the end of the project, which will have been approaching by the end of August 2025.

During the second day of the meeting, a dedicated workshop on exploitation activities was organized among the partners and hosted by the partner **Hub Trentino Innovazione (HIT)**. Working around several affordable exploitation strategies, all the partners tried to identify possible benefits and risks related to these strategies throughout a brainstorming activity. Putting together different points of view, coming not only from diverse European countries but also from several academic, VET centers and SME realities, led to finding efficient solutions to overcome the identified challenges, risks and problems.

READ MORE

During the last meeting of the project, which will be hosted by the partner University of Las Palmas de Gran Canaria, at Las Palmas, Canary Islands, (Spain) on 12th and 13th June 2025, a final decision about the exploitation of CIRC VET results after the end of the project will be taken.

FIRST C-VET VALIDATION WORSHOP

Finally, the day before the Steering Committee, 19th February, was dedicated to the first validation workshop with companies, in which spots of all the prepared modules of the free training course **“Circular Economy Expert in Sustainable Plastic Products”** have been taught to the participants by the partners of the project, some company case studies have been presented by experts of packaging sector and a test to validate and to evaluate acquired competences have been performed by each participant.
