1. Introduction

CIRCVET project, Circular Economy Practical Training Materials for Plastics Manufacturing Industries, aims at developing the most extensive, free, and tailor-made training in CE for plastics at European level.

The consortium of the project composed by 6 EU countries (Spain, Portugal, Italy, France, Germany, and Lithuania) has the objective to enhance the adoption and awareness of Circular Economy in Plastic Manufacturing Industries, through the improvement of the culture, knowledge and the skills of people working in this sector.

2. Document description

This document is the updated version of the Deliverable 9.3.1 and describes the project activities carried out by Proplast (WP9 Leader) in collaboration with project partners within the Task 9.3 (referred to the project communication and dissemination materials) of the CIRCVET project during the last 12 months.

This deliverable will describe the results obtained during the period August 2023 – July 2024.

3. Documentation templates

Several documents have been prepared for the implementation of the CIRCVET project outputs, and internal or external communication activities:

- Presentation on PowerPoint
- Letterhead
- Deliverable and reports
- Template for manual
- Template for lectures

In the last year (August 2023-July2024), Proplast prepared the following templates:

- "Opening and closing" graphic version for the videos to be used in the modules of the training material.
- Certificate of Participation to the course for the different levels and modules (**Annex I**)

4. Newsletters and press release

The newsletter and the press release have been designed using the template and structure, defined in section 4, module 2 of the D9.3.

The Newsletters of the project prepared in this report period are:

- September 2023 (Figure 1)
- December 2023 (Figure 2)
- March 2024 (Figure 3)

The Newsletters were organized and prepared in English and translated in the languages of the partnership.

CIRCVET Course
"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT"

A Comprehensive Training Course on Circular Economy on Plastic Materials, tailored to the needs of the training users and incorporating relevant company cases of plastic manufacturers; is the challenge that the partners of **CIRCVET** are facing. Nowadays, the partners are preparing the contents and the material that will be part of the new course "**CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT**". The Topics of the course will be:
 Systemic strategies, Digital skills, Recycling – Upcycling – Downcycling, Entrepreneurship, Eco-design and LCA, Manufacturing processes, Users and usages and Recovery.

>>> READ MORE

PILOTING AND VALIDATION PROCESS

The Training Course will be **piloted and validated** by selected group of learners and professionals to improve and integrate their knowledge in order to facilitate professional skills building. **Piloting process** will start in January 2024 and will be carried out in countries and regions of the consortium, through several of workshops, aiming to validate the content and to overcome any knowledge barrier. Continuous feedback on the Course materials from the stakeholders will be gathered during piloting process and the Course will be updated accordingly.

In 2025 the final set of the Course materials will be taught in countries and regions of the consortium with companies from the plastic sector and students participating in plastic-related trainings. This will allow the consortium to validate the Training Course and the accreditation system and make the materials I-VET and C-VET ready. Both, piloting and validation process, will allow **CIRCVET** to produce a high-quality level of materials as well as be aligned to the needs of companies.

The aim of the Course piloting is to make sure that the Course materials meet the needs and expectations of the stakeholders involved.

The aim of the Course validation is to make sure that the Course materials and the accreditation system are I-VET and C-VET ready and of the highest quality.

Stay turned because a partner of your country will contact you to test the new training course tagged CIRCVET!

CIRCVET
CIRCULAR ECONOMY PRACTICAL TRAINING MATERIAL FOR PLASTIC MANUFACTURING INDUSTRIES

A GREAT INITIATIVE TO PROMOTE A RESPONSIBLE CONSUMPTION IN THE CANARY ISLAND

Precious Plastic is a global movement promoted by the Dutch founder Dave Hakkens, whose objective is to combat plastic pollution through circular economy principles and firsthand recycling. Inspired by this philosophy, the group formed by Miguel, Loreto, and Momo decided in mid-2018 to dedicate their free time and knowledge to reduce plastic pollution, which we witness daily, and founded Precious Plastic Gran Canaria. The goal of this team is not only to *reduce plastic waste on our planet but also to raise awareness among people to use plastic as little as possible in their daily lives through responsible consumption, thereby preserving the paradise where we live, the Canary Islands.*

>>> READ MORE

In their projects, Miguel and Loreto combine creativity and engineering to turn waste into resources, transforming plastic "trash" such as bottle caps or ballpoint pens into useful everyday items. In fact, they have been active collaborators in globally recognized achievements, such as setting the record for the world's largest mural made from unusable writing materials (Pixel ART, University of Las Palmas GC) and the development of solidarity swimming paddles #EmpapateXelCancer. Furthermore, they are currently involved in awareness and education projects related to microplastics on coastlines, as well as the creation of furniture that provides a second chance to this versatile material in its multiple lifecycles. Among these projects is Tamaragua, which they carry out in collaboration with the Soy Mamut Association and Fundación Telefónica. The objective of this project is to raise awareness and visibility of the problem of microplastics on coastlines worldwide and it was awarded the Delta Silver Prize for industrial design last year.

NEWSLETTER

CIRCVET Project
"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT"

The CIRCVET project was born on 1st September 2022, from an alliance of shared knowledge, training resources and materials among 12 partners from across Europe. The purpose of the project is to create a broad, free and tailor-made Circular Economy (CE) training course in plastics. "Green" skills are the focus with the aim of improving the knowledge, skills and values needed to society in terms of sustainability.

In this regard, the second project meeting was held in January at the University of Las Palmas de Gran Canaria where all partners met to monitor the progress of the project. Issues related to the project's Work Packages were discussed, the results of the target group surveys were presented, the preparation of training materials on the circular economy in the plastics production sector, and finally, the requirements for the creation of the project's electronic platform and the presentation of cooperation between businesses and educational institutions were discussed.

In February, the first video, in which the partners show the most important themes and objectives to publicize the project, was published. Then, in April, a new video was released: here the benefits of the circular economy, a system in which all resources are continuously renewed, where waste from one process become raw material for another process, were described.

To see them: [Circvet.eu](https://circvet.eu) and [YouTube](#) ENJOY!

Finally, during November and December, a questionnaire was created to collect from companies specific needs regarding knowledge and skills related to circular economy.

In 2024, the testing phase of the training will begin. It will be carried out through workshops, which will be used to test materials and knowledge. The goal is to verify that the course material actually meets the needs and expectations of the involved users.

stay tuned!

CIRCVET Project
"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCTS"

In the last months, CIRCVET project partners have organized the material to be used during the training course "Circular Economy Expert in Sustainable Plastic Products".

The material composed by lectures, presentations in PowerPoint, recorded lessons, videos lessons, examples, and exercises, will be available to be piloted with students from VET centers and universities and companies' workers during the workshops organized by the partners.

On the other hand, several national events are going to be organized in order to promote e to show the future training course. In this sense, partners decided to prepare interesting agendas involving companies, students, national and regional stakeholders from the countries which are belong to. In Germany, the event has been organized by Kunststoff-Institut Lüdenscheid on March 19th.

Next events will be

- >>> 22/03/2024 in Marinha Grande (Portugal) organized by CENTIMFE
 Registration form: [here](#)**
- >>> 08/04/2024 in France organized by Infinitivity Design Lab**
- >>> 09/04/2024 in Alessandria (Italy) organized by Proplast and HIT

FOR PLASTICS MANUFACTURING INDUSTRIES

Co-financed by the

European Union

PRESS RELEASE
READY TO PILOT OUR FREE COURSE!!

As expected in the CIRCVET project application form, in 2024 the partners are going to start with the testing phase of the training course. It will be carried out through workshops, which will be used to test materials and knowledge. The goal is to verify that the course material meets the needs and expectations of the involved users.

The training course has been organized in 8 modules:

- General Circular Economy
- Eco-design and Life Cycle Assessment (LCA)
- Digital skills
- Recycling, Upcycling, and Downcycling
- Manufacturing processes
- User and usage
- Recovery
- Entrepreneurship

01/2024

The training course will be tested by students and company's workers in order to evaluate the different courses created for different target groups. The levels of the training course are I-VET – VET (initial vocational education and training for VET students), I-VET HE (initial vocational education and training for students from universities) and C-VET (continuing vocational education and training for workers). The material, prepared by partners of the project, includes lectures, presentations in PowerPoint, recorded lessons, videos lessons, examples, and exercises. The organization of the levels is different based on the target groups. Face to face lessons will be done in I-VET HE level instead of C-VET in which will be a self-learning system.

The piloting process has been scheduled as follows:

➤➤➤ **C-VET in Lithuania:** January 11th, 2024. Location: LINPRA. Companies have been attended the lecture about "Eco design and LCA" by Prof. Dr. Virginija Jankauskaitė, from Kaunas University of Technology.

➤➤➤ **C-VET in Italy:** April 9th, 2024 – Location: Proplast. Proplast, in collaboration with HIT and the University of Trento, are organizing to pilot the modules Recovery and Manufacturing processes. Companies are invited to participate to the following [LINK](#).

➤➤➤ **C-VET in France:** April 9th, 2024 – Location: Polymeris (Les Villettes (43)) and online Plastic Velya 13 rue de la grande croix 43600, Les Villettes) "POLYMERIS ORGANIZES A SOLUTION PROVIDER DAY AND B2B MEETINGS". Polymeris will pilot the module Entrepreneurship. <https://www.polymeris.fr/event/solution-provider-day-processing-integration-of-recycled-plastics.html>

➤➤➤ **C-VET in Spain:** April 10th, 2024 – Location: IBI (Alicante). AIJU is organising the "Workshop Event: Circularity strategies and industrial symbiosis in the plastics industry", with the participation of the ULPGC. In this cross disciplinary event, the Recycling, Upcycling and Downcycling module will be tested. Companies are invited to register for the event through the following link: <https://formacionaiju.es/producto/evento-workshop-estrategias-de-circularidad-y-simbiosis-industrial-en-la-industria-plastica/>

➤➤➤ **C-VET in Portugal:** March 21st, 2024 – Location: Centimfe. Companies have piloted the module Users and Usages.

➤➤➤ **I-VET-VET in Germany:** on March 6th, 2024. 15 students from the technician class at the vocational college for technology met to give the go-ahead for testing the teaching materials in Kunststoff-Institut Lüdenscheid.

➤➤➤ **I-VET-VET in Lithuania:** March-May 2024. Location: APRC and VPM. 15 students from VET centers will attend the following modules: General Circular Economy and Eco design and Life Cycle Assessment (LCA).

➤➤➤ **I-VET-HE in Spain:** April 15th to May 10th, 2024 – Location: Universidad de Las Palmas de Gran Canaria. During the course, Spanish students from the University will pilot the following modules:

- Recovery (Week 1)
- Digital skill (Week 2)
- Users and usage (Week 3)
- Entrepreneurship (Week 4)

The registration will be open until April 1st, 2024.

➤➤➤ **I-I-VET-HE in Italy:** Feb May 2024. Location: UNITN. Students from the University of Trento are attending the modules General Circular Economy, Eco-design and Life Cycle Assessment (LCA), Recycling and Manufacturing processes.

The scheduling of the pilot program is going to be completed in March.

1. Introducción

El proyecto CIRCVET, Materiales didácticos prácticos de economía circular para las industrias de fabricación de plásticos, tiene como objetivo desarrollar la formación en economía circular para plásticos más amplia, gratuita y adaptada a nivel europeo.

El consorcio del proyecto compuesto por 6 países de la Unión Europea (España, Portugal, Italia, Francia, Alemania y Lituania) tiene como objetivo fomentar la adopción y difusión de la economía circular en las industrias de fabricación de plásticos, a través de la mejora de la cultura, el conocimiento y las habilidades de los trabajadores de este sector.

2. Descripción del documento

Este documento es la versión actualizada del entregable 9.3.1 y describe las actividades del proyecto llevadas a cabo por Proplast (Líder WP9) en colaboración con los socios del proyecto dentro de la Tarea 9.3 (referida a los materiales de comunicación y difusión del proyecto) del proyecto CIRCVET durante los últimos 12 meses.

Este entregable describirá los resultados obtenidos durante el periodo comprendido entre agosto de 2023 y julio de 2024.

3. Plantillas de documentación

Se han elaborado varios documentos para la aplicación de los resultados del proyecto CIRCVET y las actividades de comunicación interna o externa:

- Presentación en PowerPoint
- Membrete
- Entregables e informes
- Plantilla para manual
- Plantilla para ponencias

En el último año (agosto 2023-julio 2024), Proplast preparó las siguientes plantillas:

- Versión gráfica de «apertura y cierre» para los vídeos que se utilizarán en los módulos del material de formación.
- Certificado de participación en el curso para los diferentes niveles y módulos (Anexo I)

4. Boletines y comunicados de prensa

El boletín y el comunicado de prensa se han diseñado utilizando la plantilla y la estructura definidas en el módulo 2 de la sección 4 del D9.3.

Los boletines informativos del proyecto elaborados en este periodo del informe son:

- Septiembre de 2023 (Figura 1)
- Diciembre de 2023 (figura 2)
- Marzo de 2024 (figura 3)

Los boletines se organizaron y prepararon en inglés y se tradujeron a las lenguas de la asociación.

CIRCVET Project
"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT"

The CIRCVET project was born on 1st September 2022, from an alliance of shared knowledge, training resources and materials among 12 partners from across Europe. The purpose of the project is to create a broad, free and fair and made Circular Economy (CE) training course in plastics. "Green" skills are the focus with the aim of improving the knowledge, skills and values needed to society in terms of sustainability.

In this regard, the second project meeting was held in January at the University of Las Palmas de Gran Canaria where all partners met to monitor the progress of the project. Issues related to the project's Work Packages were discussed, the results of the target group surveys were presented, the preparation of training materials on the circular economy in the plastics production sector, and finally, the requirements for the creation of the project's electronic platform and the presentation of cooperation between businesses and educational institutions were discussed.

In February, the first video, in which the partners show the most important themes and objectives to the project, was published. Then, in April, a new video was released: here the benefits of the circular economy, a system in which all resources are continuously renewed, where waste from one process become raw material for another process, were described.

To see them: [Circvet.eu](https://circvet.eu) and [YouTube](https://www.youtube.com) ENJOY!

Finally, during November and December, a questionnaire was created to collect from companies specific needs regarding knowledge and skills related to circular economy.

In 2024, the testing phase of the training will begin. It will be carried out through workshops, which will be used to test materials and knowledge. The goal is to verify that the course material actually meets the needs and expectations of the involved users.

stay tuned!

CIRCULAR ECONOMY PRACTICAL TRAINING MATERIAL FOR PLASTIC MANUFACTURING INDUSTRIES
Co-funded by the Erasmus+ Programme of the European Union

NEWSLETTER

CIRCVET Project
"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCTS"

In the last months, CIRCVET project partners have organized the material to be used during the training course "Circular Economy Expert in Sustainable Plastic Products".

The material composed by lectures, presentations in PowerPoint, recorded lessons, videos lessons, examples, and exercises, will be available to be piloted with students from VET centers and universities and companies' workers during the workshops organized by the partners.

On the other hand, several national events are going to be organized in order to promote e to show the future training course. In this sense, partners decided to prepare interesting agendas involving companies, students, national and regional stakeholders from the countries which are belong to. In Germany, the event has been organized by Kunststoff-Institut Lüdenscheid on March 19th.

Next events will be

- 22/03/2024 in Marinha Grande (Portugal) organized by CENTIMFE
Registration form: [here](#)
- 08/04/2024 in France organized by Infinitivity Design Lab
- 09/04/2024 in Alessandria (Italy) organized by PROPLAST and HIT

Figura 3 Boletín 03/2024

Como se especifica en el último entregable 9.3.1, el comunicado de prensa se difundió cuando se alcanzaron algunos hitos importantes. El primero se preparó en marzo de 2024 y describía el proceso de pilotaje junto con información sobre las fechas en los distintos países y la posibilidad de inscribirse en ellos.

PRESS RELEASE

READY TO PILOT OUR FREE COURSE!!

As expected in the CIRCVET project application form, in 2024 the partners are going to start with the testing phase of the training course. It will be carried out through workshops, which will be used to test materials and knowledge. The goal is to verify that the course material meets the needs and expectations of the involved users.

The training course has been organized in 8 modules:

- General Circular Economy
- Eco-design and Life Cycle Assessment (LCA)
- Digital skills
- Recycling, Upcycling, and Downcycling
- Manufacturing processes
- User and usage
- Recovery
- Entrepreneurship

01/2024

The training course will be tested by students and company's workers in order to evaluate the different courses created for different target groups. The levels of the training course are I-VET – VET (initial vocational education and training for VET students), I-VET HE (initial vocational education and training for students from universities) and C-VET (continuing vocational education and training for workers). The material, prepared by partners of the project, includes lectures, presentations in PowerPoint, recorded lessons, videos lessons, examples, and exercises. The organization of the levels is different based on the target groups. Face to face lessons will be done in I-VET HE level instead of C-VET in which will be a self-learning system.

The piloting process has been scheduled as follows:

➤➤➤ **C-VET in Lithuania:** January 11th, 2024. Location: LINPRA. Companies have been attended the lecture about "Eco design and LCA" by Prof. Dr. Virginija Jankauskaitė, from Kaunas University of Technology.

➤➤➤ **C-VET in Italy:** April 9th, 2024 – Location: Proplast. Proplast, in collaboration with HIT and the University of Trento, are organizing to pilot the modules Recovery and Manufacturing processes. Companies are invited to participate to the following [LINK](#).

➤➤➤ **C-VET in France:** April 9th, 2024 – Location: Polymeris (Les Villettes (43)) and online Plastic Velya 13 rue de la grande croix 43600, Les Villettes) "POLYMERIS ORGANIZES A SOLUTION PROVIDER DAY AND B2B MEETINGS". Polymeris will pilot the module Entrepreneurship. <https://www.polymeris.fr/event/solution-provider-day-processing-integration-of-recycled-plastics.html>

➤➤➤ **C-VET in Spain:** April 10th, 2024 – Location: IBI (Alicante). AIJU is organising the "Workshop Event: Circularity strategies and industrial symbiosis in the plastics industry", with the participation of the ULPGC. In this cross disciplinary event, the Recycling, Upcycling and Downcycling module will be tested. Companies are invited to register for the event through the following link: <https://formacionaiju.es/producto/evento-workshop-estrategias-de-circularidad-y-simbiosis-industrial-en-la-industria-plastica/>

➤➤➤ **C-VET in Portugal:** March 21st, 2024 – Location: Centimfe. Companies have piloted the module Users and Usages.

➤➤➤ **I-VET-VET in Germany:** on March 6th, 2024. 15 students from the technician class at the vocational college for technology met to give the go ahead for testing the teaching materials in Kunststoff-Institut Lüdenscheid.

The registration will be open until April 1st, 2024.

➤➤➤ **I-VET-HE in Spain:** April 15th to May 10th, 2024 – Location: Universidad de Las Palmas de Gran Canaria. During the course, Spanish students from the University will pilot the following modules:

- Recovery (Week 1)
- Digital skill (Week 2)
- Users and usage (Week 3)
- Entrepreneurship (Week 4)

The registration will be open until April 1st, 2024.

➤➤➤ **I-I-VET-HE in Italy:** Feb May 2024. Location: UNITN. Students from the University of Trento are attending the modules General Circular Economy, Eco-design and Life Cycle Assessment (LCA), Recycling and Manufacturing processes.

The scheduling of the pilot program is going to be completed in March.

Co-funded by the Erasmus+ Programme of the European Union

This project has been funded with support from the European Commission. This publication reflects the views only of the author(s) and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Todos estos documentos, boletines y comunicados de prensa, estarán disponibles en el sitio web del proyecto en la sección específica y traducidos a las lenguas de cada socio, como siempre.

5. Publicaciones

En cuanto al folleto electrónico, se ha preparado un documento revisado. El folleto actualizado se ha organizado centrándose en los objetivos y actividades del proyecto, e incluyendo la información relacionada con los temas del curso de formación. El folleto electrónico en inglés y traducido a las lenguas de los socios está disponible en la portada de la página web del proyecto. (**Anexo II**)

Proplast preparó una plantilla de artículo en inglés en la que se resumían los objetivos del proyecto, la información sobre el curso de formación, los talleres y el proceso de pilotaje y los puntos más importantes para apoyar a los socios en la publicación.

Varios socios ya han presentado algunos artículos:

- ULPGC: Mancomunidad de Ayuntamientos del Norte de Gran Canaria (24/07/2024)
https://www.mancomunidadadelnorte.org/mancom_noticias.asp?N=1030
- AIJU: Boletín AIJU: Taller CIRCVET (enero-febrero 2024), Material de formación para el pilotaje (marzo-abril 2024) y Pilotaje (mayo-junio 2024) (**Anexo III**).
- CENTIMFE tiene prevista la publicación de un artículo en octubre de 2024 en la revista que trimestralmente elabora la Cefamol - Asociación Nacional de Industrias de Moldes:
<https://www.cefamol.pt/index.php?id=85>
- Proplast tiene previsto publicar un artículo en la revista ITALIA CIRCOLARE durante el cuatrimestre: <https://www.italiacircolare.it/>

6. Conclusiones

Este entregable se publicará en una sección específica de la web y se traducirá a las lenguas de los socios.

7. Lista de anexos

Anexo I: Certificado de participación (archivo pptx)

Anexo II: Folleto electrónico (archivos pptx)

1. Introduction

Le projet CIRCVET, Circular Economy Practical Training Materials for Plastics Manufacturing Industries, vise à développer la formation CE la plus complète, gratuite et sur mesure pour les plastiques au niveau européen.

Le consortium du projet composé de 6 pays de l'UE (Espagne, Portugal, Italie, France, Allemagne et Lituanie) a pour objectif de renforcer l'adoption et la sensibilisation à l'économie circulaire dans les industries de fabrication de plastique, en améliorant la culture, les connaissances et les compétences des personnes travaillant dans ce secteur.

2. Description du document

Ce document est la version mise à jour du livrable 9.3.1 et décrit les activités du projet menées par Proplast (leader du WP9) en collaboration avec les partenaires du projet dans le cadre de la tâche 9.3 (se référant aux supports de communication et de diffusion du projet) du projet CIRCVET au cours des 12 derniers mois.

Ce livrable décrira les résultats obtenus au cours de la période d'août 2023 à juillet 2024.

3. Modèles de documentation

Plusieurs documents ont été élaborés pour la mise en œuvre des résultats du projet CIRCVET, et des activités de communication interne ou externe :

- Présentation sur PowerPoint
- En-tête
- Livrable et rapports
- Modèle pour manuel
- Modèle pour les cours magistraux

Au cours de la dernière année (août 23-juillet 24), Proplast a préparé les modèles suivants :

- Version graphique « ouverture et fermeture » des vidéos à utiliser dans les modules du matériel de formation.
- Certificat de participation au cours pour les différents niveaux et modules (**Annexe I**)

4. Newsletters et communiqués de presse

La lettre d'information et le communiqué de presse ont été conçus à l'aide du modèle et de la structure définis à la section 4, module 2 de la D9.3.

Les newsletters du projet préparés au cours de la période considérée sont les suivants :

- Septembre 2023 (Figure 1)
- Décembre 2023 (Figure 2)
- Mars 2024 (Figure 3)

Les newsletters ont été organisés et préparés en anglais et traduits dans les langues du partenariat.

NEWSLETTER

CIRCVET Course

"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT"

A Comprehensive Training Course on Circular Economy on Plastic Materials, tailored to the needs of the training users and incorporating relevant company cases of plastic manufacturers, is the challenge that the partners of CIRCVET are facing. Nowadays, the partners are preparing the contents and the material that will be part of the new course "CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT". The Topics of the course will be:

- Systemic strategies, Digital skills, Recycling – Upcycling – Downcycling, Entrepreneurship, Eco-design and LCA, Manufacturing processes, Users and usages and Recovery.

>>> READ MORE

PILOTING AND VALIDATION PROCESS

In 2025 the final set of the Course materials will be taught in countries and regions of the consortium with companies from the plastic sector and students participating in plastic-related trainings. This will allow the consortium to validate the Training Course and the accreditation system and make the materials I-VET and C-VET ready. Both, piloting and validation process, will allow CIRCVET to produce a high-quality level of materials as well as be aligned to the needs of companies.

The aim of the Course piloting is to make sure that the Course materials meet the needs and expectations of the stakeholders involved.

The aim of the Course validation is to make sure that the Course materials and the accreditation system are I-VET and C-VET ready and of the highest quality.

Stay turned because a partner of your country will contact you to test the new training course tagged CIRCVET! For more information contact us: <https://circvet.eu/contact/>

OUR VIDEOS ARE ONLINE!

03/2023

A GREAT INITIATIVE TO PROMOTE A RESPONSIBLE CONSUMPTION IN THE CANARY ISLAND

Precious Plastic is a global movement promoted by the Dutch founder Dave Hakken, whose objective is to combat plastic pollution through circular economy principles and firsthand recycling. Inspired by this philosophy, the group formed by Miguel, Loreto, and Momo decided in mid-2018 to dedicate their free time and knowledge to reduce plastic pollution, which we witness daily, and founded Precious Plastic Gran Canaria. The goal of this team is not only to reduce plastic waste on our planet but also to raise awareness among people to use plastic as little as possible in their daily lives through responsible consumption, thereby preserving the paradise where we live, the Canary Islands.

>>> READ MORE

In their projects, Miguel and Loreto combine creativity and engineering to turn waste into resources, transforming plastic "trash" such as bottle caps or balloon pens into useful everyday items. In fact, they have been active collaborators in globally recognized achievements, such as setting the record for the world's largest mural made from unusable writing materials (Pixel ART, University of Las Palmas GC) and the development of solidarity swimming paddles #EmpapateXelCancer. Furthermore, they are currently involved in awareness and education projects related to microplastics on coastlines, as well as the creation of furniture that provides a second chance to this versatile material in its multiple lifecycles. Among these projects is Tamaragua, which they carry out in collaboration with the Soy Mamut Association and Fundación Telefónica. The objective of this project is to raise awareness and visibility of the problem of microplastics on coastlines worldwide and it was awarded the Delta Silver Prize for industrial design last year.

CIRCVET Project

"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT"

The CIRCVET project was born on 1st September 2022, from an alliance of shared knowledge, training resources and materials among 12 partners from across Europe. The purpose of the project is to create a broad, free and tailor-made Circular Economy (CE) training course in plastics. "Green" skills are the focus with the aim of improving the knowledge, skills and values needed to society in terms of sustainability.

In this regard, the second project meeting was held in January at the University of Las Palmas de Gran Canaria where all partners met to monitor the progress of the project. Issues related to the project's Work Packages were discussed, the results of the target group surveys were presented, the preparation of training materials on the circular economy in the plastics production sector, and finally, the requirements for the creation of the project's electronic platform and the presentation of cooperation between businesses and educational institutions were discussed.

Project Partners reunited at the University of Las Palmas de Gran Canaria

In February, the first video, in which the partners show the most important themes and objectives to publicize the project, was published. Then, in April, a new video was released: here the benefits of the circular economy, a system in which all resources are continuously renewed, where waste from one process become raw material for another process, were described.

Polymeris will pilot the module Entrepreneurship. <https://www.polymeris.fr/event/solution-provider-day-processing-integration-of-recycled-plastics.html>

➤➤➤ **C-VET in Spain:** April 10th, 2024 – Location: Ibi (Alicante). AIJU is organising the "Workshop Event: Circularity strategies and industrial symbiosis in the plastics industry", with the participation of the ULPGC. In this cross disciplinary event, the Recycling, Upcycling and Downcycling module will be tested. Companies are invited to register for the event through the following link: <https://formacionaiju.es/producto/evento-workshop-estrategias-de-circularidad-y-simbiosis-industrial-en-la-industria-plastica/>

➤➤➤ **C-VET in Portugal:** March 21st, 2024 – Location: Centimfe. Companies have piloted the module Users and Usages.

➤➤➤ **I-VET-VET in Germany:** on March 6th, 2024. 15 students from the technician class at the vocational college for technology met to give the go-ahead for testing the teaching materials in Kunststoff-Institut Lüdenscheid.

The registration will be open until April 1st, 2024.

➤➤➤ **I-VET-HE in Spain:** April 15th to May 10th, 2024 – Location: Universidad de Las Palmas de Gran Canaria. During the course, Spanish students from the University will pilot the following modules:

- Recovery (Week 1)
- Digital skill (Week 2)
- Users and usage (Week 3)
- Entrepreneurship (Week 4)

The registration will be open until April 1st, 2024.

➤➤➤ **I-I-VET-HE in Italy:** Feb May 2024. Location: UNITN. Students from the University of Trento are attending the modules General Circular Economy, Eco-design and Life Cycle Assessment (LCA), Recycling and Manufacturing processes.

The scheduling of the pilot program is going to be completed in March.

Tous ces documents, newsletters et communiqués de presse, seront disponibles sur le site web du projet dans la section spécifique et traduits dans les langues de chaque partenaire comme toujours.

5. Publications

En ce qui concerne la brochure électronique, un document révisé a été préparé. La brochure mise à jour a été organisée en se concentrant sur les objectifs et les activités du projet, et en incluant des informations relatives aux thèmes du cours de formation. La brochure électronique en anglais et traduite dans les langues des partenaires est disponible sur la page d'accueil du site web du projet. (**Annexe II**)

Proplast a préparé un modèle d'article en anglais résumant les objectifs du projet, les informations sur le cours de formation, les ateliers et le processus de pilotage et les points les plus importants pour soutenir les partenaires de la publication.

Certains partenaires ont déjà présenté différents articles :

- ULPGC : Association des conseils municipaux du nord de Gran Canaria (24/07/2024) https://www.mancomunidaddelnorte.org/mancom_noticias.asp?N=1030
- AIJU : Bulletin d'information de l'AIJU : Passeport de produit numérique et Recyclass (janvier-février 2024) (**Annexe III**)
- CENTIMFE a programmé la publication d'un article en octobre 2024 dans le magazine préparé tous les trois mois par Cefamol – Association Nationale des Industries de Moisissures : <https://www.cefamol.pt/index.php?id=85>
- Proplast a prévu de publier un article dans la revue ITALIA CIRCOLARE au cours de la période de quatre mois : <https://www.italiacircolare.it/>

6. Conclusions

Ce livrable sera téléchargé sur la page dédiée du site web et traduit dans les langues du partenariat.

7. Liste des annexes

1. Einleitung

Das Projekt CIRCVET, Circular Economy Practical Training Materials for Plastics Manufacturing Industries, zielt darauf ab, die umfangreichste, kostenlose und maßgeschneiderte Schulung in CE für Kunststoffe auf europäischer Ebene zu entwickeln.

Das Konsortium des Projekts, das sich aus sechs EU-Ländern (Spanien, Portugal, Italien, Frankreich, Deutschland und Litauen) zusammensetzt, hat sich zum Ziel gesetzt, die Einführung und das Bewusstsein für die Kreislaufwirtschaft in der kunststoffverarbeitenden Industrie durch die Verbesserung der Kultur, des Wissens und der Fähigkeiten der in diesem Sektor tätigen Personen zu fördern

2. Dokumentenbeschreibung

Dieses Dokument ist die aktualisierte Version des Deliverable 9.3.1 und beschreibt die Projektaktivitäten, die von Proplast (WP9 Verantwortlicher) in Zusammenarbeit mit den Projektpartnern im Rahmen der Aufgabe 9.3 (bezogen auf die Projektkommunikation und Verbreitungsmaterialien) des CIRCVET-Projekts während der letzten 12 Monate durchgeführt wurden.

In diesem Bericht werden die im Zeitraum August 2023 - Juli 2024 erzielten Ergebnisse beschrieben.

3. Dokumentenvorlagen

Für die Umsetzung der CIRCVET-Projektergebnisse sowie für interne und externe Kommunikationsaktivitäten wurden mehrere Dokumente erstellt:

- Präsentation auf PowerPoint
- Briefpapier
- Deliverables und Berichte
- Vorlage für Handbuch
- Vorlage für Vorträge

Im letzten Jahr (August 2023-Juli 2024) hat Proplast die folgenden Vorlagen erstellt:

- Grafische Version "Eröffnung und Abschluss" für die Videos, die in den Modulen des Schulungsmaterials verwendet werden sollen.
- Teilnahmebescheinigung für den Kurs für die verschiedenen Stufen und Module (Anhang I)

4. Newsletters und Pressemitteilungen

Der Newsletter und die Pressemitteilung wurden unter Verwendung der in Abschnitt 4, Modul 2 des D9.3 definierten Vorlage und Struktur erstellt.

Die in diesem Berichtszeitraum erstellten Newsletter des Projekts sind:

- September 2023 (Abbildung 1)

- Dezember 2023 (Abbildung 2)
- März 2024 (Abbildung 3)

Die Newsletter wurden auf Englisch verfasst und in die Sprachen der Partner übersetzt..

CIRCVET Course “CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT”

A Comprehensive Training Course on Circular Economy on Plastic Materials, tailored to the needs of the training users and incorporating relevant company cases of plastic manufacturers, is the challenge that the partners of CIRCVET are facing. Nowadays, the partners are preparing the contents and the material that will be part of the new course “CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT”. The topics of the course will be:
Systemic strategies, Digital skills, Recycling – Upcycling – Downcycling, Entrepreneurship, Eco-design and LCA, Manufacturing processes, Users and usages and Recovery.

>>> READ MORE

PILOTING AND VALIDATION PROCESS

In 2025 the final set of the Course materials will be taught in countries and regions of the consortium with companies from the plastic sector and students participating in plastic-related trainings. This will allow the consortium to validate the Training Course and the accreditation system and make the materials I-VET and C-VET ready. Both, piloting and validation process, will allow CIRCVET to produce a high-quality level of materials as well as be aligned to the needs of companies.

The aim of the Course piloting is to make sure that the Course materials meet the needs and expectations of the stakeholders involved.
The aim of the Course validation is to make sure that the Course materials and the accreditation system are I-VET and C-VET ready and of the highest quality.

Stay turned because a partner of your country will contact you to test the new training course tagged CIRCVET!

A GREAT INITIATIVE TO PROMOTE A RESPONSIBLE CONSUMPTION IN THE CANARY ISLAND

Precious Plastic is a global movement promoted by the Dutch founder Dave Hakken, whose objective is to combat plastic pollution through circular economy principles and firsthand recycling. Inspired by this philosophy, the group formed by Miguel, Loreto, and Moreno decided in 2018 to dedicate their free time and knowledge to reduce plastic pollution, which we witness daily, and founded Precious Plastic Gran Canaria. The goal of this team is not only to reduce plastic waste on our planet but also to raise awareness among people to use plastic as little as possible in their daily lives through responsible consumption, thereby preserving the paradise where we live, the Canary Islands.

>>> READ MORE

In their projects, Miguel and Loreto combine creativity and engineering to turn waste into resources, transforming plastic “trash” such as bottle caps or plastic pens into useful everyday items. In fact, they have been active collaborators in globally recognized achievements, such as setting the record for the world's largest mural made from unusable writing materials (Pixel ART, University of Las Palmas GC) and the development of solidarity swimming paddles #EmpapagoxelCádiz. Furthermore, they are currently involved in awareness and education projects related to microplastics on coastlines, as well as the creation of furniture that provides a second chance to this versatile material in its multiple lifecycles. Among these projects is Tamarugus, which they carried out in collaboration with the Soy Marmut Association and Fundación Telefónica. The objective of this project is to raise awareness and visibility of the problem of microplastics on coastlines worldwide and it was awarded the Delta Silver Prize for industrial design last year.

CIRCVET Project “CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT”

The CIRCVET project was born on 1st September 2022, from an alliance of shared knowledge, training resources and materials among 12 partners from across Europe. The purpose of the project is to create a broad, free and tailor-made Circular Economy (CE) training course in plastic. “Green” skills are the focus with the aim of improving the knowledge, skills and values needed to society in terms of sustainability.

In this regard, the second project meeting was held in January at the University of Las Palmas de Gran Canaria where all partners met to monitor the progress of the project. Issues related to the project's Work Packages were discussed, the results of the target group surveys were presented, the preparation of training materials on the circular economy in the plastic production sector, and finally, the requirements for the creation of the project's electronic platform and the presentation of cooperation between businesses and educational institutions were discussed.

In February, the first video, in which the partners show the most important themes and objectives to publicize the project, was published. Then, in April, a new video was released: here the benefits of the circular economy, a system in which all resources are continuously renewed, where waste from one process become raw material for another process, were explained.

To see them: [Circvet.eu](https://circvet.eu) and [YouTube](#)
ENJOY!

Finally, during November and December, a questionnaire was created to collect from companies specific needs regarding knowledge and skills related to circular economy.

In 2024, the testing phase of the training will begin. It will be carried out through workshops, which will be used to test materials and knowledge. The goal is to verify that the course material actually meets the needs and expectations of the involved users.

stay tuned!

CIRCVET Project “CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCTS”

In the last months, CIRCVET project partners have organized the material to be used during the training course “Circular Economy Expert in Sustainable Plastic Products”.

The material composed by lectures, presentations in PowerPoint, recorded lessons, videos, lessons, examples, and exercises, will be available to be piloted with students from VET centers and universities and companies' workers during the workshops organized by the partners.

On the other hand, several national events are going to be organized in order to promote e to show the future training course. In this sense, partners decided to prepare interesting agendas involving companies, students, national and regional stakeholders from the countries which are belong to. In Germany, the event has been organized by Kunststoff-Institut Lüdenscheid on March 19th.

Next events will be:

»» 22/03/2024 in Marinha Grande (Portugal) organized by CENTIMFE
Registration form: [here](#)

»» 08/04/2024 in France organized by Infinitivity Design Lab

»» 09/04/2024 in Alessandria (Italy) organized by PROPLAST and HIT
Registration form: [here](#)

»» 10/04/2024 in Spain organized by AIJU in collaboration with ULPGC
Registration: [Evento Workshop: Estrategias de circularidad y simbiosis industrial en la industria plástica. - Formación AIJU](#)

Abbildung 3 Newsletter 03/2024

Wie im letzten Deliverable 9.3.1 beschrieben, wurde die Pressemitteilung verbreitet, wenn einige wichtige Meilensteine erreicht waren. Die erste Pressemitteilung wurde im März 2024 erstellt und beschrieb den Pilotprozess zusammen mit Informationen über die Termine in den verschiedenen Ländern und die Möglichkeit, sich dort zu bewerben.

PRESS RELEASE

READY TO PILOT OUR FREE COURSE!!

As expected in the CIRCVET project application form, in 2024 the partners are going to start with the testing phase of the training course. It will be carried out through workshops, which will be used to test materials and knowledge. The goal is to verify that the course material meets the needs and expectations of the involved users.

The training course has been organized in 8 modules:

- General Circular Economy
- Eco-design and Life Cycle Assessment (LCA)
- Digital skills
- Recycling, Upcycling, and Downcycling
- Manufacturing processes
- User and usage
- Recovery
- Entrepreneurship

01/2024

The training course will be tested by students and company's workers in order to evaluate the different courses created for different target groups. The levels of the training course are I-VET – VET (initial vocational education and training for VET students), I-VET HE (initial vocational education and training for students from universities) and C-VET (continuing vocational education and training for workers). The material, prepared by partners of the project, includes lectures, presentations in PowerPoint, recorded lessons, videos lessons, examples, and exercises. The organization of the levels is different based on the target groups. Face to face lessons will be done in I-VET HE level instead of C-VET in which will be a self-learning system.

The piloting process has been scheduled as follows:

➤➤➤ **C-VET in Lithuania:** January 11th, 2024. Location: LINPRA. Companies have been attended the lecture about "Eco design and LCA" by Prof. Dr. Virginija Jankauskaitė, from Kaunas University of Technology.

➤➤➤ **C-VET in Italy:** April 9th, 2024 – Location: Proplast. Proplast, in collaboration with HIT and the University of Trento, are organizing to pilot the modules Recovery and Manufacturing processes. Companies are invited to participate to the following [LINK](#).

➤➤➤ **C-VET in France:** April 9th, 2024 – Location: Polymeris (Les Villettes (43)) and online Plastic Vely 13 rue de la grande croix 43600, Les Villettes) "POLYMERIS ORGANIZES A SOLUTION PROVIDER DAY AND B2B MEETINGS". Polymeris will pilot the module Entrepreneurship. <https://www.polymeris.fr/event/solution-provider-day-processing-integration-of-recycled-plastics.html>

➤➤➤ **C-VET in Spain:** April 10th, 2024 – Location: IBI (Alicante). AIJU is organising the "Workshop Event: Circularity strategies and industrial symbiosis in the plastics industry", with the participation of the ULPGC. In this cross disciplinary event, the Recycling, Upcycling and Downcycling module will be tested. Companies are invited to register for the event through the following link: <https://formacionaiju.es/producto-workshop-estrategias-de-circularidad-y-simbiosis-industrial-en-la-industria-plastica/>

➤➤➤ **C-VET in Portugal:** March 21st, 2024 – Location: Centimfe. Companies have piloted the module Users and Usages.

➤➤➤ **I-VET-VET in Germany:** on March 6th, 2024. 15 students from the technician class at the vocational college for technology met to give the go ahead for testing the teaching materials in Kunststoff Institut Lüdenscheid.

➤➤➤ **I-VET-VET in Lithuania:** March-May 2024. Location: APRC and VPM. 15 students from VET centers will attend the following modules: General Circular Economy and Eco design and Life Cycle Assessment (LCA).

➤➤➤ **I-VET-HE in Spain:** April 15th to May 10th, 2024 – Location: Universidad de Las Palmas de Gran Canaria. During the course, Spanish students from the University will pilot the following modules:

- Recovery (Week 1)
- Digital skill (Week 2)
- Users and usage (Week 3)
- Entrepreneurship (Week 4)

The registration will be open until April 1st, 2024.

➤➤➤ **I-VET-HE in Italy:** Feb-May 2024. Location: UNITN. Students from the University of Trento are attending the modules General Circular Economy, Eco-design and Life Cycle Assessment (LCA), Recycling and Manufacturing processes.

The scheduling of the pilot program is going to be completed in March.

1. Introduzione

Il Progetto CIRCVET, Circular Economy Practical Training Materials for Plastics Manufacturing Industries, ha come obiettivo sviluppare la formazione più ampia, gratuita e su misura in materia di Economia Circolare per le materie plastiche a livello europeo.

Il consorzio del progetto è composto da 6 paesi Europei (Spagna, Portogallo, Italia, Francia, Germania, e Lituania) e ha come obiettivo migliorare l'adozione e la consapevolezza dell'Economia Circolare nelle industrie manifatturiere di materie plastiche, attraverso il miglioramento della cultura, delle conoscenze e delle competenze delle persone che lavorano in questo settore.

2. Descrizione del documento

Questo documento descrive le attività del Progetto che dovranno essere svolte da Proplast (WP9 Leader) in collaborazione con i partners del progetto all'interno della Task 9.3 (in relazione al materiale per la comunicazione e disseminazione) del progetto CIRCVET durante gli ultimi 12 mesi.

Questo deliverable descriverà i risultati ottenuti nel periodo agosto 2023 – luglio 2024.

3. Modelli di documenti

Diversi documenti sono stati preparati l'attuazione dei risultati del progetto CIRCVET e le attività di comunicazione, interne o esterne.

- Presentazione in PowerPoint
- Carta intestata
- Deliverable e reports
- Modello per manuale
- Modello per le lezioni

Durante l'ultimo anno (Agosto 2023-Luglio 2024), Proplast ha preparato i seguenti modelli:

- Versione grafica di apertura e chiusura" per i video da utilizzare nei moduli del materiale didattico.
- Attestato di partecipazione al corso per i diversi livelli e moduli (**Allegato I**)

4. Newsletters e comunicati stampa

Le newsletters ed i comunicati stampa saranno progettati utilizzando il modello e la struttura definiti nella sezione 4, modulo 2 del Deliverable 9.3.

Le Newsletters preparate durante il periodo di questo report sono:

- Settembre 2023 (Figura 1)
- Dicembre 2023 (Figura 2)
- Marzo 2024 (Figura 3)

Le Newsletters sono state organizzate e preparate in inglese dopodiché tradotte nelle lingue dei partners.

PILOTING AND VALIDATION PROCESS

The Training Course will be piloted and validated by selected group of learners and professionals to improve and integrate their knowledge in order to facilitate professional skills building. Piloting process will start in January 2024 and will be carried out in countries and regions of the consortium, through several of workshops, aiming to validate the content and to incorporate it in the knowledge. The workshops will be organized for the trainees in their native language to ensure the absence of the language barrier. Continuous feedback on the Course materials from the stakeholders will be gathered during piloting process and the Course will be updated accordingly.

In 2025 the final set of the Course materials will be taught in countries and regions of the consortium with companies from the plastic sector and students participating in plastic-related trainings. This will allow the consortium to validate the Training Course and the accreditation system and make the materials I-VET and C-VET ready. Both, piloting and validation process, will allow CIRCVET to produce a high-quality level of materials as well as be aligned to the needs of companies.

The aim of the Course piloting is to make sure that the Course materials meet the needs and expectations of the stakeholders involved.

The aim of the Course validation is to make sure that the Course materials and the accreditation system are I-VET and C-VET ready and of the highest quality.

CIRCVET Project
"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCTS"

In the last months, CIRCVET project partners have organized the material to be used during the training course "Circular Economy Expert in Sustainable Plastic Products".

The material composed by lectures, presentations in PowerPoint, recorded lessons, videos lessons, examples, and exercises, will be available to be piloted with students from VET centers and universities and companies' workers during the workshops organized by the partners.

On the other hand, several national events are going to be organized in order to promote e to show the future training course. In this sense, partners decided to prepare interesting agendas involving companies, students, national and regional stakeholders from the countries which are belong to. In Germany, the event has been organized by Kunststoff-Institut Lüdenscheid on March 19th.

Next events will be

- 22/03/2024 in Marinha Grande (Portugal) organized by CENTIMFE Registration form: [here](#)
- 08/04/2024 in France organized by Infinitivity Design Lab
- 09/04/2024 in Alessandria (Italy) organized by Proplast and HIT Registration form: [here](#)
- 10/04/2024 in Spain organized by AJIU in collaboration with ULPGC Registration: [Evento Workshop: Estrategias de circularidad y simbiosis industrial en la industria plástica. – Formación AJIU](#)

Come già specificato nell'ultimo Deliverable 9.3.1, il comunicato stampa è stato pubblicato quando sono stati riscontrati importanti milestones da raggiungere. Il primo è stato preparato a Marzo 2024 e descriveva il processo di prova insieme a tutte le informazioni riguardo le date dei workshop nei diversi paesi con la possibilità di aderire iscrivendosi agli eventi.

CIRCVET
 CIRCULAR ECONOMY PRACTICAL TRAINING MATERIAL FOR PLASTICS MANUFACTURING INDUSTRIES

PRESS RELEASE
READY TO PILOT OUR FREE COURSE!!

As expected in the CIRCVET project application form, in 2024 the partners are going to start with the testing phase of the training course. It will be carried out through workshops, which will be used to test materials and knowledge. The goal is to verify that the course material meets the needs and expectations of the involved users.

The training course has been organized in 8 modules:

- General Circular Economy
- Eco-design and Life Cycle Assessment (LCA)
- Digital skills
- Recycling, Upcycling, and Downcycling
- Manufacturing processes
- User and usage
- Recovery
- Entrepreneurship

01/2024

The training course will be tested by students and company's workers in order to evaluate the different courses created for different target groups. The levels of the training course are I-VET – VET (initial vocational education and training for VET students), I-VET HE (initial vocational education and training for students from universities) and C-VET (continuing vocational education and training for workers). The material, prepared by partners of the project, includes lectures, presentations in PowerPoint, recorded lessons, videos lessons, examples, and exercises. The organization of the levels is different based on the target groups. Face to face lessons will be done in I-VET HE level instead of C-VET in which will be a self-learning system.

The piloting process has been scheduled as follows:

➤➤➤ **C-VET in Lithuania:** January 11th, 2024. Location: LINPRA. Companies have been attended the lecture about "Eco design and LCA" by Prof. Dr. Virginija Jankauskaitė, from Kaunas University of Technology.

➤➤➤ **C-VET in Italy:** April 9th, 2024 – Location: Proplast. Proplast, in collaboration with HIT and the University of Trento, are organizing to pilot the modules Recovery and Manufacturing processes. Companies are invited to participate to the following [LINK](#).

➤➤➤ **C-VET in France:** April 9th, 2024 – Location: Polymeris (Les Villettes (43)) and online Plastic Velya 13 rue de la grande croix 43600, Les Villettes) "POLYMERIS ORGANIZES A SOLUTION PROVIDER DAY AND B2B MEETINGS". Polymeris will pilot the module Entrepreneurship. <https://www.polymeris.fr/event/solution-provider-day-processing-integration-of-recycled-plastics.html>

➤➤➤ **C-VET in Spain:** April 10th, 2024 – Location: IBI (Alicante). AIJU is organising the "Workshop Event: Circular strategies and industrial symbiosis in the plastics industry", with the participation of the ULPGC. In this cross disciplinary event, the Recycling, Upcycling and Downcycling module will be tested. Companies are invited to register for the event through the following link: <https://formacionaiju.es/producto/evento-workshop-estrategias-de-circularidad-y-simbiosis-industrial-en-la-industria-plastica/>

➤➤➤ **C-VET in Portugal:** March 21st, 2024 – Location: Centimfe. Companies have piloted the module Users and Usages.

➤➤➤ **I-VET-VET in Germany:** on March 6th, 2024. 15 students from the technician class at the vocational college for technology met to give the go-ahead for testing the teaching materials in Kunststoff-Institut Lüdenscheid.

The registration will be open until April 1st, 2024.

➤➤➤ **I-VET-HE in Spain:** April 15th to May 10th, 2024 – Location: Universidad de Las Palmas de Gran Canaria. During the course, Spanish students from the University will pilot the following modules:

- Recovery (Week 1)
- Digital skill (Week 2)
- Users and usage (Week 3)
- Entrepreneurship (Week 4)

The registration will be open until April 1st, 2024.

➤➤➤ **I-I-VET-HE in Italy:** Feb May 2024. Location: UNITN. Students from the University of Trento are attending the modules General Circular Economy, Eco-design and Life Cycle Assessment (LCA), Recycling and Manufacturing processes.

The scheduling of the pilot program is going to be completed in March.

PARTNERSHIP

Co-funded by the Erasmus+ Programme of the European Union

This project has been funded with support from the European Commission. This publication reflects the views only of the author(s) and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Tutti questi documenti, newsletter e comunicati stampa, saranno disponibili sul sito web del progetto nella sezione specifica e tradotti come sempre in ogni lingua partner.

5. Publicazioni

Riguardo la E-brochure è stato preparato un documento rivisto. L'aggiornamento della brochure è stato organizzato in modo da focalizzarsi sugli obiettivi del progetto e sulle attività, includendo anche le informazioni relative ai diversi topic e sub-topic del corso di formazione. L'E-brochure in inglese e nelle lingue dei partners è disponibile nella homepage del sito del Progetto. (**Allegato II**)

Proplast ha preparato un modello di articolo in inglese nel quale sono state riassunti gli obiettivi del progetto, le informazioni riguardo il Corso di formazione, i workshop ed il processo di prova, ed in fine i punti più importanti in modo da supportare i partners per la pubblicazione della stessa.

Alcuni partners hanno già presentato diversi articoli:

- ULPGC: Mancomunidad de Ayuntamientos del Norte de Gran Canaria (24/07/2024) https://www.mancomunidaddelnorte.org/mancom_noticias.asp?N=1030
- AIJU: AIJU Newsletter: Passaporto digitale dei prodotti e Recyclase (January-February 2024) (**Allegato III**)
- CENTIMFE ha programmato la pubblicazione di un articolo nell'ottobre 2024 sulla rivista pubblicata ogni tre mesi da Cefamol – Associazione Nazionale Industrie Stampi: <https://www.cefamol.pt/index.php?id=85>
- Proplast ha in programma la pubblicazione di un articolo sulla rivista ITALIA CIRCOLARE nel corso del quadriennio 2024: <https://www.italiacircolare.it/>

6. Conclusioni

This deliverable will be uploaded in the dedicated page on the website and translated in the partnership languages.

7. Lista di Allegati

Allegato I: Attestato di partecipazione (pptx file)

Allegato II: E-brochure (pptx files)

1. Įvadas

CIRCVET projektu „Žiedinės ekonomikos praktinė mokomoji medžiaga plastikų gamybos pramonei“ siekiama Europos lygmeniu parengti plačiausius, nemokamus ir specialiai plastikams pritaikytus CE mokymus.

Projekto konsorciumas, kurį sudaro 6 ES šalys (Ispanija, Portugalija, Italija, Prancūzija, Vokietija ir Lietuva), siekia didinti žiedinės ekonomikos įsisavinimą ir žinomumą plastiko gamybos pramonėje, per kultūros, žinių ir šiame sektoriuje dirbančių žmonių įgūdžių gerinimą.

Commentato [ŽŠ1]: Informaciją taisiau 9.3.1.
dokumente

2. Dokumento aprašymas

Šis dokumentas yra atnaujinta 9.3.1 Pristatymo versija, kuriame aprašoma projekto veiklą, kurią Proplast (WP9 vadovas) vykdė bendradarbiaujant su projekto partneriais pagal CIRCVET projekto 9.3 užduotį (nurodyta projekto komunikacijos ir skliaudos medžiagoje) per pastaruosius 12 mėnesius.

Šiame dokumente yra aprašomi rezultatai, gauti nuo 2023 m. rugpjūčio mėn. iki 2024 m. liepos mėn.

Commentato [ŽŠ2]: Informaciją taisiau 9.3.1.
dokumente

3. Dokumentacijos šablonai

CIRCVET projekto rezultatams įgyvendinti ir vidinės ar išorinės komunikacijos veiklai vykdyti parengti šie dokumentai:

- PowerPoint pristatymas
- Officialus blankas
- Pristatymas ir ataskaitos
- Instrukcijos šablonas
- Paskaityų šablonas

2023 m. rugpjūčio mén.–2024 m. liepos mén. partneris Proplast parengė šiuos šablonus:

- "Atidarymo ir uždarymo" grafinė versija, skirta vaizdo įrašams, kurie bus naudojami mokymo medžiagos moduliuose.
- Dalyvavimo skirtinguose lygiuose ir modulių kursuose sertifikatas (I priedas)

4. Naujienlaiškiai ir pranešimai spaudai

Naujienlaiškiai ir pranešimai spaudai parengti naudojant šabloną ir struktūrą apibrėžtą D9.3.2 modulio 4 skyriuje.

Šiuo ataskaitiniu laikotarpiu parengti šie projekto naujienlaiškiai:

- 2023 m. rugsėjo mén. (1 pav.)
- 2023 m. gruodžio (2 pav.)
- 2024 m. kovo mén. (3 pav.)

Naujienlaiškiai buvo parengti anglų ir išversti į partnerių nacionalines kalbas.

CIRCVET – Circular Economy Practical Training Materials for Plastics Manufacturing Industries

NEWSLETTER

CIRCVET Course “CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT”

A Comprehensive Training Course on Circular Economy on Plastic Materials, tailored to the needs of the training users and incorporating relevant company cases of plastic manufacturers. It is developed by the partners of CIRCVET taking into account the needs of the industry, the users are preparing to contribute the material that will be part of the new course “CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT”. The topics of the course include: Circular Economy, Circular Economy Principles, Circular Systemic strategies, Digital skills, Recycling – Upcycling – Downcycling, Entrepreneurships, Eco-design and LCA, Manufacturing processes, Users and usages and Recovery.

>>> READ MORE

PILOTING AND VALIDATION PROCESS

In 2023 the final set of the Course materials will be taught in countries and regions of the consortium with companies from the plastic sector and students participating in plastic-related trainings. This will allow the consortium to validate the Training Course and the accreditation system and make the materials I-VET and C-VET ready. Both, piloting and validation process, will allow CIRCVET to produce a high-quality level of materials as well as be aligned to the needs of companies.

The aim of the Course piloting is to make sure that the Course materials meet the needs and expectations of the stakeholders involved.

The aim of the Course validation is to make sure that the Course materials and the accreditation system are I-VET and C-VET ready and of the highest quality.

Stay turned because a partner of your country will contact you to test the new training course tagged CIRCVET! For more information contact us: <https://circvet.eu/contact/>

OUR VIDEOS ARE ONLINE!

See our project video, the first one in which partners show the most important topics and goals of our project and the second one regarding “circular economy” aspects. To see them: circvet.eu and [YouTube](https://www.youtube.com). ENJOY!

A GREAT INITIATIVE TO PROMOTE A RESPONSIBLE CONSUMPTION IN THE CANARY ISLAND

Precious Plastic is a global movement promoted by the Dutch founder Dave Hakken, whose objective is to combat plastic pollution through circular economy principles and firsthand recycling. Inspired by this philosophy, the group formed by Miguel, Loreto, and Mireia decided to use their free time and knowledge to reduce plastic pollution, which we witness daily, and founded Precious Plastic Gran Canaria. The goal of this team is not only to reduce plastic waste on our planet but also to raise awareness so that people can use plastic as little as possible in their daily lives through responsible consumption, thereby preventing the paradox where we live. In their projects, Miguel and Loreto combine creativity and engineering to turn waste into resources, transforming discarded plastic as much as possible into useful items in everyday life. In fact, they have been active collaborators in globally recognized achievements, such as setting the record for the world's largest mural made from unusable working plastic waste in Las Palmas de Gran Canaria and developing a solidarity swimming paddle #DesapalosCaribe. Furthermore, they are currently involved in awareness and education projects related to microparticles on coasts as well as the creation of tools that facilitate the collection of plastic waste on beaches. They are members of the organization Tamaragua, which they carry out in collaboration with the Soy Marmal Association and Fundación Telefónica. The objective is to raise awareness about the importance and viability of the problem of microparticles on coasts worldwide and it was awarded the Delta Silver Prize for industrial design last year.

CIRCVET Project “CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT”

The CIRCVET project was born on 1st September 2022, from an alliance of shared knowledge, training resources and materials among 12 partners from across Europe. The purpose of the project is to create a broad, free and tailor-made Circular Economy (CE) training course in plastics. “Green” skills are the focus with the aim of improving the knowledge, skills and values needed to society in terms of sustainability.

In this regard, the second project meeting was held in January at the University of Las Palmas de Gran Canaria where all partners met to monitor the progress of the project. Issues related to the project's Work Packages were discussed, the needs of the target group surveyed, were presented the main areas of training, the creation of circular economy in the plastic production sector, and finally, the requirements for the creation of the project's electronic platform and the presentation of cooperation between businesses and educational institutions were discussed.

Project Partners reunited at the University of Las Palmas de Gran Canaria

In February, the first video, in which the partners show the most important topics and objectives to promote the project, was published. Then, in March, a video was released highlighting the benefits of the circular economy, a system in which all resources are continuously renewed, where waste from one process become raw material for another process, were released.

To see them: circvet.eu and [YouTube](https://www.youtube.com)

Finally, during November and December, a questionnaire was created to collect from companies specific needs regarding knowledge and skills related to circular economy.

In 2024, the testing phase of the training will begin. It will be carried out through webinars, the platform will be used to test materials and knowledge. The goal is to verify that the course material actually meets the needs and expectations of the involved users.

Stay tuned!

CIRCVET – Circular Economy Practical Training
Materials for Plastics Manufacturing Industries

Kaip nurodyta paskutiniame pristatyme 9.3.1, pranešimai spaudai buvo platinami pasiekus tam tikrą svarbų projekto etapą. Pirmasis pranešimas spaudai parengtas 2024 m. kovo mėn., kuriame aprašytas vykdotas pilotavimo procesas skirtingose šalyse atitinkamomis datomis, kartu su galimybe registratorius jų veiklas.

PRESS RELEASE

READY TO PILOT OUR FREE COURSE!!

As expected in the CIRC-VET project application form, in 2024 the partners are going to start with the testing phase of the training course. It will be carried out through workshops, which will be used to test materials and knowledge. The goal is to verify that the course material meets the needs and expectations of the involved users.

The training course has been organized in 8 modules:

- General Circular Economy
- Eco-design and Life Cycle Assessment (LCA)
- Digital skills
- Recycling, Upcycling, and Downcycling
- Manufacturing processes
- User and usage
- Recovery
- Entrepreneurship

01/2024

The training course will be tested by students and company's workers in order to evaluate the different courses created for different target groups. The levels of the training course are I-VET - VET (initial vocational education and training for VET students), II-VET HE (initial vocational education and training for students from universities and CVET) (continuing vocational education and training for workers). The material will be provided by partners of the project, includes lecture presentations in PowerPoint recorded lessons, video lessons, examples, exercises and exercises. The organization of the levels is different based on the target group. Face-to-face lessons will be done in I-VET HE level instead of CVET which will be a self learning system.

The piloting process has been scheduled as follows:

➡ ➡ **C-VET in Lithuania: January 11th, 2024; Location: UNIPRA.** Companies have been attended the lecture about "Eco design and LCA" by Prof. Dr. Virginija Janakauskaitė, from Kaunas University of Technology.

➡ ➡ **C-VET in Italy: April 9th, 2024; Location: Proplast.** Companies are invited to participate to the following [LINK](#).

➡ ➡ **C-VET in France: April 9th, 2024; Location: Polymeris (Les Villettes (43)) and online Plastic Valley 13 rue de la grande croix 43600, Les Villettes.** "POLYMERIS ORGANIZES A SOLUTION PROVIDER DAY AND ELC MEETINGS". Polymeris will pilot the module Recovery and Manufacturing processes. Companies are invited to participate to the following [LINK](#).

➡ ➡ **C-VET in Spain: April 10th, 2024; Location: IBI (Alicante).** AJU is organising the "Workshop Event: Circular strategies and industrial symbiosis in the plastics industry", with the participation of the University. In this cross disciplinary event, the Recycling, Upcycling and Downcycling module will be tested. Companies are invited to register for the event through the following link: <https://formacionaju.es/producto/evento-workshop-estrategias-de-circularidad-y-simbiosis-industrial-en-la-industria-plastica/>

➡ ➡ **C-VET in Portugal: March 21st, 2024 - Location: Centimfe.** Companies have piloted the module Users and Usages.

➡ ➡ **I-VET-VET in Germany: March 6th, 2024.** 15 students from the vocational college of Kunststoff Institut Lüdenscheid met to give the go-ahead for testing the teaching materials in Kunststoff Institut Lüdenscheid.

➡ ➡ **I-VET-VET in Lithuania: March-May 2024.** Location: APRC and VPM. 15 students from VET centers will attend the following modules: General Circular Economy and Eco design and Life Cycle Assessment (LCA).

➡ ➡ **I-VET-HE in Spain: April 15th to May 10th, 2024 - Location: Universidad de Las Palmas de Gran Canaria.** During the course, Spanish students from the University will pilot the following modules:

- Recovery (Week 1)
- Digital skill (Week 2)
- Users and usage (Week 3)
- Entrepreneurship (Week 4)

The registration will be open until April 1st, 2024.

➡ ➡ **II-VET-HE in Italy: Feb-May 2024.** Location: UNITN. Students from the University of Trento are attending the modules General Circular Economy, Eco design and Life Cycle Assessment (LCA), Recycling and Manufacturing processes.

The scheduling of the pilot program is going to be completed in March.

1. Introdução

O projeto CIRCVET, Circular Economy Practical Training Materials for Plastics Manufacturing Industries, visa desenvolver a formação mais extensa, gratuita e personalizada em CE para plásticos a nível europeu.

O consórcio do projeto composto por 6 países da UE (Espanha, Portugal, Itália, França, Alemanha e Lituânia) tem como objetivo aumentar a adoção e sensibilização para a Economia Circular nas Indústrias de Fabrico de Plástico, através da melhoria da cultura, dos conhecimentos e das competências das pessoas que trabalham neste setor.

2. Descrição do documento

Este documento é a versão atualizada do produto 9.3.1 e descreve as atividades do projeto realizadas pela Proplast (WP9 Leader) em colaboração com os parceiros do projeto no âmbito da Tarefa 9.3 (referente aos materiais de comunicação e divulgação do projeto) do projeto CIRCVET durante os últimos 12 meses.

Este entregável descreve os resultados obtidos durante o período de agosto de 2023 a julho de 2024.

3. Templates

Foram preparados vários templates para o projeto CIRCVET e para as atividades de comunicação interna ou externa:

- Apresentação em PowerPoint
- Papel timbrado
- Resultados e relatórios
- Modelo para manuais
- Modelo para palestras

No último ano (agosto de 2023 a julho de 2024), a Proplast elaborou os seguintes templates:

- Versão gráfica da abertura e encerramento para os vídeos a utilizar nos módulos do material de formação.
- Certificado de Participação no curso para os diferentes níveis e módulos (**Anexo I**)

4. Newsletters e press release

A newsletter e o press release foram concebidos utilizando o modelo e a estrutura definidos na secção 4, módulo 2, da D9.3.

As newsletters do projeto elaboradas neste período de reporte são:

- Setembro de 2023 (Figura 1)
- Dezembro de 2023 (Figura 2)
- Março de 2024 (Figura 3)

As newsletters foram organizadas e preparadas em inglês e traduzidas para as línguas da parceria.

CIRCVET Course
"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT"

A Comprehensive Training Course on Circular Economy on Plastic Materials, tailored to the needs of the training users and incorporating relevant company cases of plastic manufacturers, is the challenge that the partners of CIRCVET are facing. Now we are in the process of preparing the content and the material that will be part of the new course "CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT". The Topics of the course will be:
Systemic strategies, Digital skills, Recycling – Upcycling – Downcycling, Entrepreneurship, Eco-design and LCA, Manufacturing processes, Users and usages and Recovery.

[>>> READ MORE](#)

PILOTING AND VALIDATION PROCESS

The Training Course will be piloted and validated by selected group of learners and professionals to improve and integrate their knowledge in order to facilitate professional skills building.
Piloting process will start in January 2024 and will be carried out in countries and regions of the consortium through series of workshops, that are intended to serve as a test of key materials and knowledge. The workshops will be organized for the **trainees in their native languages** to ensure the absence of the language barrier. Companies involved on the Course materials from the stakeholders will be gathered during piloting process and the Course will be updated accordingly.

In 2025 the final set of the Course materials will be taught in countries and regions of the consortium with companies from the plastic sector and students participating in plastic-related trainings. This will allow the consortium to validate the Training Course and the accreditation system and make the materials I-VET and C-VET ready. Both, piloting and validation process, will allow CIRCVET to produce a high-quality level of materials as well as be aligned to the needs of companies.

The aim of the Course piloting is to make sure that the Course materials meet the needs and expectations of the stakeholders involved.

The aim of the Course validation is to make sure that the Course materials and the accreditation system are I-VET and C-VET ready and of the highest quality.

Stay turned because a partner of your country will contact you to test the new training course tagged CIRCVET!

A GREAT INITIATIVE TO PROMOTE A RESPONSIBLE CONSUMPTION IN THE CANARY ISLAND

Precious Plastic is a global movement promoted by the Dutch founder Dave Hakken, whose objective is to combat plastic pollution through circular economy principles and firsthand recycling. Inspired by this philosophy, the group formed by Miguel, Loreto, and Monro decided in mid-2018 to dedicate their free time and knowledge to reduce plastic pollution, which we witness daily, and founded Precious Plastic Gran Canaria. The goal of this team is not only to **reduce plastic waste** on our planet but also to **raise awareness among people to use plastic as little as possible** in their daily lives through responsible consumption, thereby preserving the paradise where we live, the Canary Islands.

[>>> READ MORE](#)

In their projects, Miguel and Loreto combine creativity and engineering to turn waste into resources, transforming plastic "trash" such as bottle caps or balloon pens into useful everyday items. In fact, they have been active collaborators in globally recognized achievements, such as setting the record for the world's largest mural made from unusable writing materials (Pixel ART, University of Las Palmas GC) and the development of solidarity swimming paddles #EmpapateXelCancar. Furthermore, they are currently involved in awareness and education projects related to microplastics on coastlines, as well as the creation of furniture that provides a second chance to this versatile material in its multiple lifecycles. Among these projects is Tamaragua, which they carry out in collaboration with the Soy Marmut Association and Fundación Telefónica. The objective of this project is to raise awareness and visibility of the problem of microplastics on coastlines worldwide and it was awarded the Delta Silver Prize for industrial design last year.

CIRCVET Project
"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCT"

The CIRCVET project was born on 1st September 2022, from an alliance of shared knowledge, training resources and materials among 12 partners from across Europe. The purpose of the project is to create a broad, free and tailor-made Circular Economy (CE) training course in plastics. "Green" skills are the focus with the aim of improving the knowledge, skills and values needed to society in terms of sustainability.

In this regard, the second project meeting was held in January at the University of Las Palmas de Gran Canaria where all partners met to monitor the progress of the project. Issues related to the project's Work Packages were discussed, the results of the target group surveys were presented, the preparation of training materials on the circular economy in the plastics production sector, and finally, the requirements for the creation of the project's electronic platform and the presentation of cooperation between businesses and educational institutions were discussed.

In February, the first video, in which the partners show the most important themes and objectives to publicize the project, was published. Then, in April, a new video was released: here the benefits of the circular economy, a system in which all resources are continuously renewed, where waste from one process become raw material for another process, were described. To see them: Circvet.eu and [YouTube ENJOY!](https://www.youtube.com/enjoy)

Finally, during November and December, a questionnaire was created to collect from companies specific needs regarding knowledge and skills related to circular economy. In 2024, the testing phase of the training will begin. It will be carried out through workshops, which will be used to test materials and knowledge. The goal is to verify that the course material actually meets the needs and expectations of the involved users.
Stay tuned!

CIRCVET Project
"CIRCULAR ECONOMY EXPERT IN SUSTAINABLE PLASTIC PRODUCTS"

In the last months, CIRCVET project partners have organized the material to be used during the training course "Circular Economy Expert in Sustainable Plastic Products".

The material composed by lectures, presentations in PowerPoint, recorded lessons, videos lessons, examples, and exercises, will be available to be piloted with students from VET centers and universities and companies' workers during the workshops organized by the partners.

On the other hand, several national events are going to be organized in order to promote e to show the future training course. In this sense, partners decided to prepare interesting agendas involving companies, students, national and regional stakeholders from the countries which are belong to. In Germany, the event has been organized by Kunststoff-Institut Lüdenscheid on March 19th.

Next events will be

- »» 22/03/2024 in Marinha Grande (Portugal) organized by CENTIMFE
Registration form: [here](#)
- »» 08/04/2024 in France organized by Infinitivity Design Lab
- »» 09/04/2024 in Alessandria (Italy) organized by Proplast and HIT

Figura 3 Newsletter 03/2024

Conforme especificado no último Entregável 9.3.1, o comunicado de imprensa foi divulgado quando alguns marcos importantes foram alcançados. O primeiro foi preparado em março de 2024 e descreveu o processo piloto juntamente com as informações sobre as datas nos diferentes países e a possibilidade de se candidatar a estes.

READY TO PILOT OUR FREE COURSE!!

As expected in the CIRCVET project application form, in 2024 the partners are going to start with the testing phase of the training course. It will be carried out through workshops, which will be used to test materials and knowledge. The goal is to verify that the course material meets the needs and expectations of the involved users.

The training course has been organized in 8 modules:

- General Circular Economy
- Eco-design and Life Cycle Assessment (LCA)
- Digital skills
- Recycling, Upcycling, and Downcycling
- Manufacturing processes
- User and usage
- Recovery
- Entrepreneurship

01/2024

The training course will be tested by students and company's workers in order to evaluate the different courses created for different target groups. The levels of the training course are I-VET – VET (initial vocational education and training for VET students), I-VET HE (initial vocational education and training for students from universities) and C-VET (continuing vocational education and training for workers). The material, prepared by partners of the project, includes lectures, presentations in PowerPoint, recorded lessons, videos lessons, examples, and exercises. The organization of the levels is different based on the target groups. Face to face lessons will be done in I-VET HE level instead of C-VET in which will be a self-learning system.

The piloting process has been scheduled as follows:

➤➤➤ **C-VET in Lithuania:** January 11th, 2024. Location: LINPRA. Companies have been attended the lecture about "Eco design and LCA" by Prof. Dr. Virginija Jankauskaitė, from Kaunas University of Technology.

➤➤➤ **C-VET in Italy:** April 9th, 2024 – Location: Proplast. Proplast, in collaboration with HIT and the University of Trento, are organizing to pilot the modules Recovery and Manufacturing processes. Companies are invited to participate to the following [LINK](#).

➤➤➤ **C-VET in France:** April 9th, 2024 – Location: Polymeris (Les Villettes (43)) and online Plastic Velya 13 rue de la grande croix 43600, Les Villettes) "POLYMERIS ORGANIZES A SOLUTION PROVIDER DAY AND B2B MEETINGS". Polymeris will pilot the module Entrepreneurship. <https://www.polymeris.fr/event/solution-provider-day-processing-integration-of-recycled-plastics.html>

➤➤➤ **C-VET in Spain:** April 10th, 2024 – Location: IBI (Alicante). AIJU is organising the "Workshop Event: Circularity strategies and industrial symbiosis in the plastics industry", with the participation of the ULPGC. In this cross disciplinary event, the Recycling, Upcycling and Downcycling module will be tested. Companies are invited to register for the event through the following link: <https://formacionaiju.es/producto/evento-workshop-estrategias-de-circularidad-y-simbiosis-industrial-en-la-industria-plastica/>

➤➤➤ **C-VET in Portugal:** March 21st, 2024 – Location: Centimfe. Companies have piloted the module Users and Usages.

➤➤➤ **I-VET-VET in Germany:** on March 6th, 2024. 15 students from the technician class at the vocational college for technology met to give the go-ahead for testing the teaching materials in Kunststoff-Institut Lüdenscheid.

The registration will be open until April 1st, 2024.

➤➤➤ **I-VET-HE in Spain:** April 15th to May 10th, 2024 – Location: Universidad de Las Palmas de Gran Canaria. During the course, Spanish students from the University will pilot the following modules:

- Recovery (Week 1)
- Digital skill (Week 2)
- Users and usage (Week 3)
- Entrepreneurship (Week 4)

The registration will be open until April 1st, 2024.

➤➤➤ **I-I-VET-HE in Italy:** Feb May 2024. Location: UNITN. Students from the University of Trento are attending the modules General Circular Economy, Eco-design and Life Cycle Assessment (LCA), Recycling and Manufacturing processes.

The scheduling of the pilot program is going to be completed in March.
